

I love XM radio! I have a very unique taste in music that does not include the top 10 hits. I love music that is artistic and not just repetitive nonsense. I am in awe of the diversity of music provided by XM, which I could not hear on regular stations. I think that it is disgusting that they are trying to limit XM's programs. To me it all boils down to power and money, and the power seems to be shifting. More people are interested in commercial free channels, and more concise weather and traffic information. I know I enjoy listening to music that is not plagued with advertisements. WE WANT MORE XM, NOT LESS!
